- Safety reviews of tractors and farm equipment

What we do for you

At TW Safety Consulting Services Inc., your interest comes first. We tailor all our services to suit each client, because no two industries are alike. Our experts help you stand in compliance with environmental and ministry requirements.

We are specialized to carry out environment and industrial hygiene surveys and studies in green houses and plants. Our reports are authored inline to the ministry regulations.

Our industrial hygienists will carry out a detailed examination of the subject environment with state of the art testing equipment. All the reports will be verified by certified industrial hygienists (CIH) or professional engineers (P Eng) prior introduction to the facility.

TW Safety engineers will carry out a detailed examination to ensure that:

A Safety Review Report outlines all areas of non-compliance and the measures necessary to achieve compliance to section 1 and 2 of Occupational Health and Safety Guidelines for Farming Operations in Ontario.

The employer has to comply with the applicable sections of the Regulation for Farming Operations, O. Reg. 414/05, Critical Injury Defined, R.R.O. 1990, Reg. 834 and Occupational Health and Safety Awareness and Training, O. Reg. 297/13. for the farm equipment or process.

Diversity is our strength, our team of trainers believe that beyond their expertise there lies the interest of trainees and value of the training in their everyday work. We organise trainings from AODA, Fire Safety, First Aid, lifting devices, lock-out, Rack training, WHIMIS and many more. We offer our trainings in English, French and Spanish to bridge the linguistic gap between the training material and the trainees.

Bonjour

Hello

Hola !

Greenhouses are now, more than ever, being investigated by the Ministry of Labour. With accidents and fatalities having fines reaching upwards of \$1.5 million dollars, employers must protect themselves by having every piece of equipment checked and certified as safe for use. If ever there is an issue of injury or fatality within your company and, we will deal with the Ministry of Labour for you so that your production is uninterrupted and fines and penalties can be minimized.

About Us

Terry Waraich, Ph. D., President and Principal Consultant

He has 23 years of experience as Occupational Health and Safety Officer with Ministry of Labour, Government of Ontario. In addition, he worked as an Occupational Hygiene Consultant in well-known private consultant companies, in Ontario, Canada. He has Ph.D., M.Sc., and B.Sc. (Honours) degrees in Chemistry and Occupational Health and Safety Program.

He has comprehensive experience working with a wide spectrum of workplaces such as industrial establishments (that includes auto, tool and die, stamping, truss building, greenhouses etc. industries), government agencies, hospitals, and municipalities.

Dan Fitzpatrick, Director of Construction Safety Services

Dan Fitzpatrick has over 20 years of construction safety experience with the Ontario Ministry of Labour, including 10 years as a Construction Safety Inspector and 5 years as District Manager of the Windsor Office. He has also served for 5 years as Director of Construction Safety with TW Safety Consulting Services Inc. Dan has provided safety expertise on major projects, including the Gordie Howe International Bridge and Amazon facilities.
