- Dust Collectors
- Material Handling
- Confined Spaces

What we do for you

At TW Safety Consulting Services Inc., your interest comes first. We tailor all our services to suit each client, because no two industries are alike. Our experts help you stand in compliance with PSR requirements.

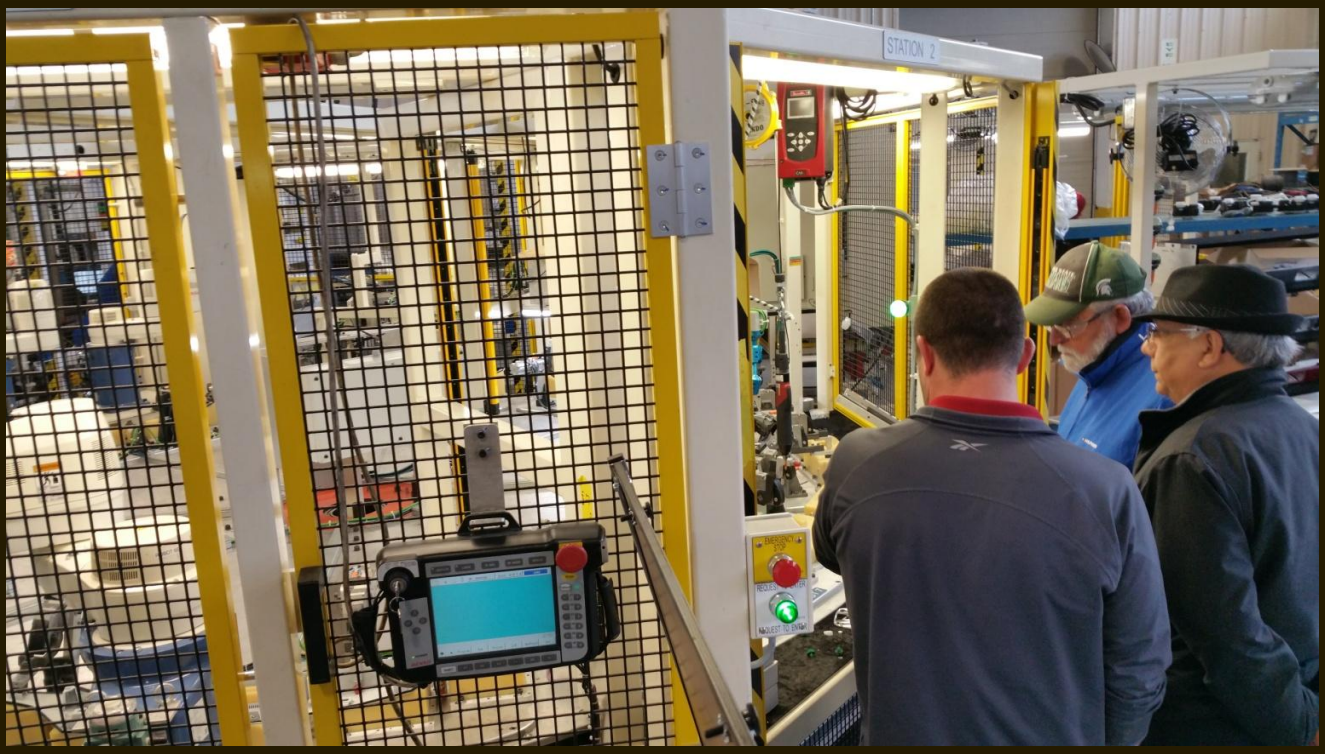
A PSR includes a written report that outlines all areas of non-compliance and the measures necessary to achieve compliance (steps, actions or engineering controls as required by subsection 7(4) of the Ontario Regulation 851/90).

TW Safety engineers will carry out a detailed examination to ensure that:

A PSR report outlines all areas of non-compliance and the measures necessary to achieve compliance (steps, actions or engineering controls as required by subsection 7(4));

and

The employer has complied with the applicable sections of the Industrial Establishments Regulation 851/90 for the apparatus, structure, protective element or process.



Where a pre-start health and safety review (PSR) is not required or an exemption from the requirements of Section 7 of the Ontario Regulation 851/90 applies, the employer must ensure that workers will be protected when they use any apparatus, structure, protective element or process in the workplace.
